# Lawn & Plant Starter

- Increases root development
- Reduces transplant shock
- Contains auxins, cytokinins & oligosaccharides
- Makes over 200 ltrs

Australian  
made & owned

1 litre

Approved Organic Input

Lawn & Plant Starter is a bio-stimulant blend of seaweed, plant extracts and vitamins, with a small amount of nitrogen fertiliser.

The seaweed and plant extracts contain a range of growth regulators and antioxidants which enable transplanted seedlings to re-establish with increased root development and minimal transplant shock.

Lawn & Plant Starter contains auxins, cytokinins, betaines, antioxidants and oligosaccharides and well as a very small amount of nitrogen fertiliser.

The auxins, cytokinins and oligosaccharides work together to increase root development, whereas the betaines and antioxidants reduce the effect of cell and plant proteins being destroyed as a result of transplant shock.

✓ **General fertilising:**  
Dilute 40 ml, (2 cap fulls) of concentrate into 9 litres of water.

✓ **Lawns:**  
Dilute 40 ml, (2 cap fulls) of concentrate into 9 litres of water. Apply every 2 -3 weeks during the growing season.

✓ **Young plants & Seedlings:**  
Dilute 20 ml, (1 cap fulls) of concentrate into 9 litres of water. Apply every 2 -3 weeks.

Analysis	
Nitrogen	0.3%
Potassium	2.1%
Phosphorus	0.7%
Sulphur	0.5%
Auxins	100 ppm
Cytokinin-like	100 ppm
Filtration	100 mic

%W/V is grams per 100ml of product  
ppm is parts per million on weight basis  
g/l is grams per litre  
mic = microns
