Fair Dinkum Fertilizers Lawn Feeder is a blend of liquid seaweed

plus additional macro nutrients and chelated trace elements. The liquid seaweed is made from Australian bull kelp and it promotes root development and top growth, stimulates flowering and fruiting and helps the plant cope with moisture and temperature stress. Furthermore liquid seaweed helps the growth of beneficial microbes which are important in the breakdown of organic material in the soil and the release of soil nutrients.

The chelated trace elements are easily taken up by plants and the movement of the trace elements within the plant is facilitated by chelation. Lawn Feeder can be applied about every three to four weeks during the growing season.

The product is suitable for use on most plants except some fungi. Applications to native trees should be limited to two or three applications per year because of its phosphorus content. It should not be applied if the temperature is above 30°C.

- ✓ **Directions:**
1. Remove pins from the top of the spray nozzle.
 2. Attach the hose to the connector and turn hose on.
 3. Lift stopper when ready to spray.
Product will start to disperse immediately from the bottle.
 4. Apply over plants and lawns accordingly.
This 2 litre bottle will cover up to 300 square metres.
After use, replace pins in spray nozzle if any contents remain in the bottle.

- ✓ **This is a Re-Usable spray bottle.**
To reuse this bottle, remove the spray nozzle and put 400ml of Fair Dinkum Fertilizers seaweed concentrate into the bottle, and fill the remainder of the bottle with water.
Attach spray nozzle and apply as per directions above.

Analysis	
Nitrogen	1.8%
Phosphorus	0.4%
Potassium	1.7%
Copper	80 ppm
Zinc	80 ppm
Manganese	15 ppm
Magnesium	10 ppm
Iron	100 ppm
Boron	9 ppm
Molybdenum	2 ppm
Filtration	100 mic

%W/W is grams per 100ml of product
ppm is parts per million on weight basis
g/l is grams per litre
mic = microns
